A List of all the EMD Engines on Diesel Engine Trader

The 2,250 hp came from two 12 cylinder model 567B engines, each driving a generator to power the two traction motors on one truck. The E8 was the ninth model in the line of passenger diesels of similar design known as EMD E-units. Starting in September 1953, a total of 21 E8As were built which used either the 567BC or 567C engines.

Electro-Motive Diesel - Wikipedia

The General Motors EMD engine line is typical of the two-stroke diesel breed. These engines were introduced in the 1930s and power a large number of the diesel locomotives found in the United States. There have been three successive series in the EMD line: the 567 series, the 645 series, and the 710 series.

EMD 645 Diesel Engine - classicstreamliners.com

The EMD E8 was one of the final models in the series the builder produced. Manufactured during the late 1940s through the mid-1950s the E8 was the one of the most successful in the series (selling nearly 500 examples), which was largely due to EMD's lofty status as the premier locomotive manufacturer of the era.
