Three Branches of Natural Science: Physical, Earth & Life ...

The heavier elements found on the earth were produced in a supernova and were collected as the solar system formed. This stands in direct opposition to the creation of the earth described in Genesis. The Bible presents the view that God created the entire universe, including each individual atom, out of nothing in six days, not from the constant process of stellar evolution over billions of years.

The presupposition of long ages is an icon and foundational to the evolutionary model. Nearly every textbook and media journal teaches that the earth is billions of years old. Using radioactive dating, scientists have determined that the Earth is about 4.5 billion years old, ancient enough for all species to have been formed through evolution.¹ The earth is now regarded as between 4.5 and 4.6 ...

Uplift occurs because of the tremendous heat forces contained beneath Earth's crust, the rocky outer layer that forms the planet's surface. Deep underground, at Earth's core, temperatures exceed 9,900°F (5,482°C). The planet's interior would melt if the heat energy created by such high temperatures were not released.

And when they raised up Christ, the Lamp of Light of all the earth, and set Him upon the candlestick of the Cross, the light of the sun became dark, and was extinguished, and a covering of darkness was spread over the whole earth. Three nails were driven into the body of our Redeemer, two through His hands, and one through both His feet.
